

EXAMPLE

# YTC-3 POKA YOKE+ CONTROLLER WITH: RRI-70RG

**Dimensions:**

YTC-3 Poka Yoke+ controller with: RRI-70RG

**Target torques:**

M8, 28 Nm

**In use by:**

Manufacturer of bicycles, located in Germany

**Advantages for this customer:**

After having worked with continuous drive tools for many years, increased sales of the bikes made it necessary to increase the productivity.

The impulse technology offers 2.000 RPM, against 400 RPM of the continuous drive tools.

YTC-3 controllers offer superior clampforces and very stable final-torque results, independent of the material of the product.

**Conclusions:**

- High accuracy of final torque
- Fast assembly
- Lightweighted tools

**Tightening applications on:**

Assembly of stander on bicycle frame.
